

Precision Engineering, Ongoing Consistency

In technical collaboration with
 **KUREHA ELASTOMER** CO., LTD. JAPAN

The journey so far...

- MSB in technical collaboration with Kureha Elastomer Co Ltd., a leading Japanese manufacturer of Cots and Aprons, brings the finest quality Cots and Aprons to the textile industry
- Kureha Elastomer is a pioneer in the manufacturing of Cots and Aprons since 1950's
- Adopting the expertise of Kureha Elastomer, we, MSB have adopted state of the art technology, imported machinery and quality raw material at our manufacturing unit at Navi Mumbai, India
- We have direct presence in India's key textile centric markets such as Tamil Nadu, Gujurat, Punjab etc., while our overseas offices include Dubai (UAE), Istanbul (Turkey) and Dhaka (Bangladesh)

MSB Kureha - High Quality, Precision Engineering, Ongoing Consistency

- The selection of raw materials, mixing and treatment process used in the manufacturing of the Cots and Aprons is as per stringent Kureha standards and specifications
- The highly modernized manufacturing process, coupled with stringent in-house testing and inspection procedures ensures that we deliver world class products consistently
- The state of art Research and Development facility along with our experienced and dynamic team ensures that innovations and improvements is a ongoing process
- All are products are tested for numerous parameters like inside diameter, thickness, width, tensile strength, elongation, abrasion, visual inspection etc.
- Our qualified and experienced sales team ensure excellent technical support and world class after sales service
- Our high quality Cots and Aprons ensure the finest yarns making MSB Kureha an ideal and reliable partner

Type, Uses & Features

Yarn Type	
C	Cotton
PC	Polyester Cotton
PV	Polyester Viscose
P	100% Polyester
W	Wool
A	Acrylic
TX	Texturing
HS	Hosiery
WR	Warp
HT	High Twist
CRS	Coarse Count
FC	Fine Count
LY	Lycra

Working Performance	
AB	Abrasion resistance
LP	Lap resistance
OZ	Ozone resistance
YQ	Yarn Quality
GR	Long grinding cycle
H	Heat resistance
OL	Oil resistance

Machine	
DF	Draw Frame
CB	Comber
SF	Roving Frame
RF	Ring Frame
OE	Open End
CMP	Compact Spinning

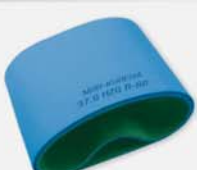

Type of Us	
T	Top Apron
B	Bottom Apron
Fr	Front Roller
Bk	Back Roller

Spinning & Roving Aprons

Grade	Colour	Yarn Type	Features	Details	Product
TA-58	Grey	C P/C	AB SF RF T B	Is an excellent compound well known for its overall properties combining both Flexibility along with abrasion resistance. It is well known around the world for producing yarns with high elongation owing to its flexibility. It is well suited for Cotton, Polyester Cotton.	
TA-47	Green	P/V P	AB H SF RF T B	Is well known for 100% Polyester & Polyester Viscose it has excellent abrasion resistance and heat resistance properties.	
7545	Reddish Grey	W A	AB LP SF RF T B	Is a traditional compound to produce long staple fibers such as Wool and Acrylic. It has excellent abrasion resistance and Stability.	
TA-70	Grey	OE, TFO		Cordless apron for open end + TFO Machine	

R-Series Apron

R-40	Light Grey	C FC	OZ YQ H RF T	It is the top Apron to process Superfine Cotton. It has Excellent surface finish to handle the finest yarns and Tremendous resistance to ozone.	
R-50	Black	P/V P	AB SF RF T	It is used as top Apron for 100% polyester, when the expectation is to have an Apron to process polyester with long service life the recommendation is to use this apron. It has a unique composition for stability and harsh use over a long period of time.	
R-60	Blue	C CRS LY	AB CMP RF T B	It is the Apron used to process Compact Yarns. It is developed keeping in mind extreme abrasion needs compact yarns have on the Apron. It again has a polymer to withstand this abrasion and keep yarn stability to outperform any competitive apron in this segment.	

Air Jet Spinning Apron

JET B	Black	C PC	MVS MJS TB	For Cotton & PC	
JET G	Whitish Grey	P CRS	MVS MJS TB RF	For Polyester	

Spinning & Roving Cots

Grade/ Shore A Hardness	Colour	Yarn Type	Features	Details	Product
R1406-63	Green	CFC	YQ RF FR	Front roller for 100% Cotton, (High Yarn quality).	
R1406-64	Yellow	C WR HT FC	AB LP YQ GR RF FR CMP	Is an excellent non treatment Soft cot with good lap resistance and capacity to produce excellent yarn quality. It has the maximum resilience and excellent resistance to grooving.	
R1406-70	Orange	C WR HT CRS	AB LP GR RF CMP FR	Is an excellent non treatment Soft cot with good lap resistance and capacity to produce excellent yarn quality. It has the maximum resilience and excellent resistance to grooving.	
R1406-75	Grey	C PC WR HT CRS	AB LP GR RF FR BR MJS MVS MTS	Is an excellent non treatment Soft cot with good lap resistance and capacity to produce excellent yarn quality. It has the maximum resilience and excellent resistance to grooving.	
R062-75	Pale Brown	C	RF BR	Soft type back roller for 100% cotton.	
R062-83-85	Light Pink	C W A	AB LP GR H OL DF SF RF OE FR BR	Is our standard type for this application and can provide excellent yarn quality along with heat stability and long life. Also has excellent resistance to lapping and very long life. It is used as a back roller for Cotton. It is also suitable for Acrylic and wool.	
R184-85	Brown	PV P	AB LP GR H OL RF FR BR	Is our standard type for 100% Polyester and polyester viscose application.	
R184-90	Sand Brown White	P	AB LP GR H OL SF RF FR BR	Is our standard type for 100% Polyester application and also sometimes Polyester Viscose applications. It has excellent heat stability. Also has excellent resistance to lapping and very long life. It is used as a Front/back roller for 100% Polyester and sometimes P/V with minimal tendency to lapping.	

Preparatory Cots

Grade	Colour	Yarn Type	Features	Details	Product
R241-65	Light Grey	C	LP DF CB	Is a soft compound well used all over the world for this application and has reasonable abrasion resistance and excellent anti lapping properties.	
R062-83 R062-85	Light Pink	C PC P	LP DF	It is our standard compound for draw frame application.	

Texturising Cots

P 65	Pink	P	AB OL TX	Is a good compound exhibiting resistance against Oil and heat.	
P 70	Green	P	AB OL GR TX	Is a harder compound for increased abrasion resistance.	
N 65	Black	P	AB OL TX	Is a black colored cot and provides excellent protection against lapping and is especially good in oily conditions. It also has good abrasion.	
N 80	Black	P N	AB OL TX ATX	Is a hard cot for the longest life in texturing for Coarse deniers and Nylon filaments where resistance to grooving is required.	

Texturising Aprons

TEX-80	Orange	P	AB H TX	It is the harder upper material for High speed texturing, when there is a desire to have an apron with a longer life there is recommendation for this material.	
TEX-70	Blue	DW	AB GR TX	It is soft type for draw winding texturing application.	
TEX-60	Violet	P	AB	It is soft type for harsh use such as cationic, dyed yarn etc.	

World-Wide quality....for you
